## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed on 01/16/2007 is acknowledged and has been entered into the records. The Examiner has accepted the amended specification and the corrected drawings/replacement sheets. Claims 45-64 are pending in the application.

### ***Allowable Subject Matter***

2. Claims 45-64 are allowable.

3. Claim 45 is allowable because, prior art of record taken alone or in combination, fails to disclose or render obvious an apparatus comprising a light source providing a beam of substantially collimated light to a vessel comprising a wall and core adapted to contain a sample for detection and to define at least two spatially separated transmitted light paths that are coupled to individual detector locations on an array detector, in combination with the rest of the limitations of claim 45.

It is noted that the closest prior art to the applicant's claimed invention is CIBA GEIGY AG (EP 0616211 A). However CIBA GEIGY AG is silent on a light source providing a beam of substantially collimated light to a vessel and coupling transmitted light to individual detector locations on an array detector. With regard to the collimated beam, CIBA GEIGY AG teaches away from a light source providing a beam of substantially collimated light to a vessel as evidenced by Figure 3, which shows a divergent beam exiting the optical fiber and incident on the vessel wall.

4. Claims 46-64 are allowable because they are dependent on independent claims 45 or an intermediate claim, and they include all the allowable limitations of the parent claim(s).

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
